*\*Contains metallic aggregate*

**REFERENCE:**

1992 DOTD Standard Specifications, Subsection 1018.27 (Metric/English)  
DOTD Project Plans and/or Special Provisions

**NOTE 1:**

The products listed above are cementitious non-shrink grouts which require only the addition of water. These products are not intended to provide rapid strength gain.

The water content shown represents the amount of water by weight used in qualifying the product. This water content produces a grout having a flowable consistency and does not necessarily represent the manufacturer's recommended water content shown on the grout container. A non-shrink grout may lose its nonshrinkage characteristics at water contents exceeding the listed values.

**NOTE 2:**

All material, regardless of prior approval, shall be sampled in accordance with the Materials Sampling Manual and tested for conformance to the original specification. Any deviation in composition or performance from the original sample submitted may result in removal of the product from the qualified list.

**No information contained in this list is to be used for promotional purposes.**
